QUIET OPS // LEAVE-BEHIND

What an Agent May Do on Its Own and What It Must Never Do

An allow, block, escalate worksheet for one job

The job: _____

1 ALLOW

Routine cases the rules cover completely. Write one rule: if these facts, then allow, with the reason and the owner.

2 ESCALATE

Cases the rules cannot settle pass up: a fast judge, then a risk rating, a person last. What context does each add? Who gets the last stop, and who when they are away? How long? If nobody answers, it waits.

3 NEVER (BLOCK)

Absolute stops, whatever the agent is told. Write the stop and the number or fact it checks. Keep the list short.

4 TEST IT ON LAST YEAR

Run each rule over last year's cases. Allowed _____ Blocked _____ Passed up _____

Was any case you would not have wanted allowed among the allowed? Was a right case stopped? Can one person handle the escalations?

5 WHO CHANGES A RULE? (never the same person for both)

Proposes: _____ Approves: _____

No level can answer? It holds and tells a person. If you cannot fill in 5, the rules are not ready to go on.
